Projects

Car service

HTML, CSS, JavaScript, React

Jan 2025 – Present

- Designed and developed a responsive and interactive frontend for a car rental website, focusing on a seamless user experience and intuitive design.
- Built essential UI features such as Car Search, Booking Forms, Rental Pricing Calculator, and Real-Time Availability Display using React components and state management.
- Integrated user interface elements for authentication, payment options (UI only), and car listings with responsive layouts using modern CSS and component libraries.

Lifeguard Solutions

HTML, CSS, JavaScript, React

Feb 2024 – Sep 2024

- Designed and developed an innovative insurance website tailored, specifically for LIC field agents, aimed at streamlining their daily operations.
- Implemented a range of features including a Premium Calculator, Apply for Claim functionality, Plan Purchase options, Premium Payment portal, and various other utilities to enhance agent efficiency and customer service.
- Successfully reduced the manual efforts and time required for agents to perform essential tasks by integrating online payment option which optimized their workflow and allowed them to focus more on client interactions and business growth.
